Introduction and consent

Welcome and thank you for participating in this survey! Given the current pandemic the world is experiencing today, contact tracing applications have raised as a solution of keeping trace of cases and we want to know what you think about this!

This research aims at understanding the usage of contact tracing application among university students. The research is being carried out by Claudia Negri Ribalta, Mauricio Vargas and Oliver Karras.

Participation in this survey is voluntary. You can leave the survey at any time and Qualtrics offers you the possibility of resuming the survey from where you left it. The survey is less than 30 questions and should take you around 8-10 minutes to fulfill.

We know your time is limited, so we will be sorting 3 Kindle for those who wish to participate (we will provide the link at the end of the survey, so we cannot link your answer with your data). Your answers will be much appreciated.

Last but not least, do not worry about your personal data, this study only captures your answer and no other information (no IP, name, or other personal information that might allows us to identify you). Furthermore, Qualtrics is GDPR compliant (if you wish to read further, please click here <https://www.qualtrics.com/gdpr/> and the privacy statement <https://www.qualtrics.com/privacy-statement/>). Once the survey has ended, the data will be

Demographics

How do you identify yourself?

Are you a university student (undergraduate, master or PhD under 32)?

☐ Yes

☐ No

Which area do you study?

In what university are you studying? [Optional]

Some definitions

This definitions will be available throughout the survey, by hovering over the different variables

Open source

Means that all the code of a software is available and open to anybody.

Proprietary code

Is the contrary of open source, can't be read by anybody but people from the organization that programmed the application.

Data protection

Means, in a high level, that it follows the rules of the GDPR.

- **Little data protection** represents that it involves **minimum security** and data protection, **there is no guaranteed that the data subject rights** will be respected and that there is a high chance for data breaches to happen and might not be informed;
- **Basic data protection** means that **there is security and data protection but it might not be up-to date, most but not all data subject rights** are guaranteed and data breaches might happen but will be informed in the according time;
- **High data protection** means that **security and data protection frameworks are up to date, all data subject rights** are embedded and **guaranteed**, it follows the principles of **data minimization and retention**, and there is little chance that a data breach happens, and if it does, it will be informed.

Now we will present you 8 different scenarios, that we would like you to rate in a scale from one (1) to eleven (11) how comfortable would you feel downloading such application.

One (1) represent that you would never, under no condition, download such application. Eleven (11) represent that you would happily download such application, use it everyday the whole day, and give all the permissions that it requests (such as usage of GPS, access to your contact list, among others)

You can always go back in the survey and change your answers if you wish.

Covid

The vignettes have been deleted from this Annex, as the data was not used in this chapter.

Have you downloaded a COVID-19 contact tracing application in 2020? (It doesn't matter if you have uninstalled it, or don't use it)

- ☐ Yes
- ☐ No

Have you used a COVID-19 contact tracing application in the last month in your phone?

- ☐ Yes
- ☐ No

How much do you trust these organizations? Being 1 cannot be trusted at all and 11 can be trusted fully

	1	2	3	4	5	6	7	8	9	10	11	
Government												<input type="text"/>
Universities or educational organizations												<input type="text"/>
Private organization												<input type="text"/>

How important are these elements for you? 1 being not important at all and 11 being extremely important

	1	2	3	4	5	6	7	8	9	10	11
Data protection											<input type="text"/>
Open source code											<input type="text"/>

If you wish to add any personal perceptions of COVID-19 contact tracing apps, views or any comment you wish to share with us, please feel free! This is completely optional
